

## April 2022

After a couple of glitches in production, everything is now back on track and rewards for Circuitry are being assembled and will start being posted out in the 1st week of May.

It's been an exciting and productive month particularly in terms of developing Oganika and building up the webpages on our site. If you have a browse you'll find a full pack of free PnP puzzles to use with your Oganika sets. Having had an opportunity to think carefully about how to move ahead with Oganika, I've begun to consider a restyling - Oganika Arcanum, which will return the product to its original concept - and managed to discuss different production methods in an attempt to improve the quality and feel of the tiles. All of this whilst still making sure that anyone who has already bought an Oganika set will still be able to use their set with any of the new updates.

The solo game of float downstream has been fully prototyped and is ready to go, so work has begun on the kickstarter pages. In addition to this however, I have in mind an expansion pack of an additional 18 cards which will expand the solo game but also provide for a multipayer one

as well, but more work needs to be done on that going forward.

So basically that's it for the moment...at least for April anyway. Take care and happy gaming!

*Jeremy*
